EDUCATION

Worcester Polytechnic Institute

Bachelor of Science in Computer Science | GPA: 3.93

Worcester, MA

2023 - 2027

Relevant Coursework: Software Engineering, Algorithms, Object-Oriented Design, Systems Programming, Operating Systems

Palisades High School

National Honor Society | Engineering Pathways Program | STEM Club | Varsity Football & Wrestling Captain

Kintnersville, PA

2019 - 2023

PROJECTS

TemporaAI | Introduction to AI | Worcester, MA

Typescript, Next.js, AI Agents, Vercel, PERN, Git

- Collaborated in a 5-person team to develop an AI-assisted calendar platform to streamline schedule management for students.
- Built a responsive interface using Next.js and Tailwind CSS to enable intuitive event creation and editing.
- Implemented full-stack CRUD functionality with Node.js, PostgreSQL, Prisma, and NextAuth to manage users and schedules.
- Integrated an OpenAI-powered agent via LangChain using NLP and RAG workflows to safely inspect, modify, and create user schedules.

Brigham & Women's Hospital | Software Engineering | Worcester, MA

TypeScript, PERN, AWS, Git, Agile

- Built a full-stack PERN application cloud-deployed using AWS with 2D/3D hospital pathfinding, first-person-view navigation, service request modules, RFID authentication, and voice-enabled UI.
- Led Agile development on an 11-person team as Product Owner: managed Jira backlog and facilitated sprint planning to ensure all deadlines were met on schedule.
- Integrated frontend and backend systems, live data filtering, and REST APIs, improving scalability and UI responsiveness.
- Received exceptional recognition, and development practices were incorporated into WPI's SWE curriculum for future teams.

AI in Education | Interactive Qualifying Project | Zürich, Switzerland

Artificial Intelligence, Research, Collaboration

- Researched AI adoption in higher education through interviews and surveys, with emphasis on generative AI tools, prompt engineering practices, and course curriculum.
- Analyzed qualitative and quantitative data in a 4-member team to uncover patterns, challenges, and opportunities for classroom integration.
- Delivered regular findings to faculty and sponsors, guided project decisions and refined communication and analysis skills.

LEADERSHIP

House Manager | Theta Chi Epsilon | Worcester, MA

Jan 2026 - Present

- Executive position, oversee house maintenance, renovations, and inspections with contractors and property management.
- Manage \$14,000+ annual budget to plan and execute projects, repairs, and code compliance initiatives.

Details (Cleaning) Manager | Theta Chi Epsilon | Worcester, MA

Feb 2025 - Present

- Manage \$4,000+ budget and supply inventory for 80+ members, reducing costs by 30%.
- Built script to optimize cleaning schedules, streamlining operations, reducing missed tasks, and improving organization.
- Coordinate chapter cleanings twice weekly, achieving an 18/20 chairman review score for performance and leadership.

Risk Manager | Theta Chi Epsilon | Worcester, MA

Mar - May 2024

- Enforced safety and compliance protocols at events, ensuring policy adherence and reducing potential risks.

EXPERIENCE

Property & Operations Management | Self-Employed | Bucks County, PA

May - Aug 2025

- Managed weekly operations across 5+ properties, including general maintenance, animal support, and equipment operation.
- Performed independent operations for clients and optimized time management to ensure consistent, high-quality service.

Landscaper | GoreCon Inc. | Bristol, PA

May - Aug 2024

- Collaborated on large-scale landscape projects with a 5-person crew for residential and commercial clients.
- Applied structured problem-solving and teamwork to deliver high-quality outcomes in demanding environments.

Lumber Yard Associate | Wehrung's | Ottsville, PA

June - Aug 2023

- Assisted customers with material selection and order fulfillment while operating yard equipment and organizing inventory to maintain accurate, efficient, and safe workflow operations.
- Strengthened teamwork, communication, and problem-solving skills through daily collaboration in a high-demand environment.

SKILLS

Programming Languages: Java, Python, JavaScript (TypeScript), C++, HTML, CSS, SQL

Software & Tools: Git, GitHub, React, Next.js, Node.js, PostgreSQL, Scikit-learn, Pandas, Express, PrismaORM, Figma, Jira

Technical Skills: Full Stack Development, Data Structures & Algorithms, Object-Oriented Programming, Databases, Version Control, UI/UX Design, Agile & Scrum
